

## **CURRICULUM PLANNING Version 1.17**

The Early Years Learning Framework (EYLF) is our approved learning framework. Our Philosophy statement (which is reviewed annually) guides our pedagogy. EYLF affirms that our curriculum encompasses all the interactions, experiences, routines and events (planned and spontaneous) that are designed to foster learning and development in our integrated birth to school entry setting. The program is play based and underpinned by current national and international Early Childhood research supporting an emphasis on communication and language, cognitive, social and emotional development. Children are integrated for the majority of the day but are formally divided into smaller groups for more developmentally appropriate intentional teaching experiences for short periods of time. We believe in an emergent curriculum, in accordance with the Early Years Learning Framework (EYLF) and its practices and principles, the DECD Literacy and Numeracy Indicators and the DfE 2019 Guidelines for Literacy and Numeracy. The EYLF is child centred, focussed on play, inclusive, open ended, challenging and inquiry based. It acknowledges children's prior experiences within a secure and happy atmosphere which will complement the home environment and nurture children's dispositions to learning. The program forms a foundation for ensuring that children in our Birth to school entry integrated setting experience quality teaching and learning. All learning experiences are offered to enhance the individual child's growth and development, including their self-esteem, resilience, persistence, independence and empathy.

The Children's Centre promotes a balance between an educational curriculum and care program through a team of Educators, Allied Health and Community Development professionals. Noticeboards, photos and children's artwork display the curriculum, spontaneous experiences, and related EYLF information, every day. An Individual Learning Plan (ILP) is developed for each child in conjunction with the child's parents and is based on information provided by families through Enrolment forms, Parent Questionnaire and informal discussions. Goals are established on the ILP and they are evaluated twice yearly.

Families receive information in their child's portfolio which consists of Learning Stories, photos, noticing's, small and large group experiences and creative work. Learning Stories mostly include a narrative, an analysis of the learning based on the EYLF and may include references to Literacy and Numeracy Indicators, Literacy and Numeracy Guidebooks, Preschool Position Statement, Executive Function and some future goals. Educators meet to plan and evaluate the curriculum and have regular Program Review and Professional Learning meetings. The EYLF Learning Outcomes describe the dimensions of learning and development and are used as evidence to track children's progress over time. Parents are encouraged to speak to their child's Primary Educator for information about their child and their progress. If this is not convenient, parents can be phoned or emailed. Parents are also able to use the SeeSaw App. Parent interviews are offered at mutually convenient times so that parents can meet with their child's Primary Educator.

### **Children's Observations**

- Educators will observe and collect developmental records on all children. This information will be confidential.

### **Children's Portfolio's**

- Portfolios are always available to children and families. Families are encouraged to contribute to their child's portfolio and to take them home at any time. The child's portfolio is theirs to keep when they leave the Centre.
